Contents

CHAPTER 1: HISTORY AND DESIGN OF THE TOTAL KNEE PROSTHESIS	11
1.1 Resection arthroplasty and early designs of total knee prosthesis	12
1.2 The modern era of knee arthroplasty	13
1.2.1 <i>Hinged prostheses</i>	13
1.2.2 <i>Meniscal bearing and rotating platform knees</i>	13
1.2.3 <i>Total condylar type prostheses</i>	14
1.3 General design criteria for knee prostheses	15
1.3.1 <i>Design of the femoral component</i>	17
1.3.2 <i>Design of the tibial component</i>	17
1.3.3 <i>Design of the patellar component</i>	18
1.3.4 <i>Fixation</i>	18
1.4 Design of the SKI prosthesis	18
1.5 The operation procedure at Groningen University Hospital	22
1.6 Locking of the screw	22
CHAPTER 2: STUDY POPULATION AND AIMS OF THE STUDY	25
2.1 Study population	26
2.2 Aims of the study	28
CHAPTER 3: SURVIVAL AND COMPLICATIONS	31
3.1 Introduction	32
3.2 Material and methods	33
3.2.1 <i>Patients</i>	33
3.2.2 <i>Revisions and survival analysis</i>	33
3.2.3 <i>Complications</i>	34
3.2.4 <i>Statistical analysis</i>	37
3.3 Results	37
3.3.1 <i>Revisions</i>	37
3.3.2 <i>Survival analysis</i>	38
3.3.3 <i>Survival of the SKI prosthesis after exchange of the polyethylene</i>	40
3.3.4 <i>Complications</i>	41
3.3.4.2 <i>Complications related to the prosthesis or knee</i>	42
3.3.4.1 <i>Complications not related to the prosthesis</i>	42
3.3.5 <i>Wound problems and superficial infection</i>	46
3.3.6 <i>Deep infection</i>	46
3.3.7 <i>Manipulation of the knee under anesthesia</i>	48
3.3.8 <i>Screw loosening</i>	50
3.3.9 <i>Wear</i>	53
3.3.10 <i>Aseptic loosening of the prosthesis</i>	54
3.4 Discussion	59
3.5 Conclusions	64
CHAPTER 4: CLINICAL PERFORMANCE OF THE SKI PROSTHESIS	67
4.1 Introduction	68
4.2 Material and methods	69
4.2.1 <i>Scoring systems</i>	70
4.2.2 <i>Statistical analysis</i>	72
4.3 Results	73
4.3.1 <i>Knee Score</i>	73
4.3.2 <i>Pain</i>	77
4.3.2.1 <i>Pain Score</i>	77
4.3.2.2 <i>VAS Score</i>	80
4.3.2.3 <i>Anterior knee pain</i>	82

4.3.3 Range of motion	86
4.3.3.1 Flexion	90
4.3.3.2 Flexion contractures	93
4.3.4 Stability and alignment	97
4.3.5 Function Score	98
4.3.6 Total Score	103
4.3.7 Scores in patients with degenerative arthritis and rheumatoid arthritis	105
4.3.8 Scores before and after polyethylene exchange	109
4.4 Discussion	110
4.5 Conclusions	115
CHAPTER 5: RADIOGRAPHIC EXAMINATION: ALIGNMENT AND WEAR	117
5.1 Introduction	118
5.2 Technique of radiographic examination	119
5.3 Reliability of the radiographic measurements	122
5.3.1 Determination of the original thickness of the polyethylene insert	122
5.3.2 Radiographic measurement of the thickness of the polyethylene insert	122
5.3.3 Determination of the intraclass correlation coefficient	124
5.3.4 Discussion	124
5.3.5 Conclusions	124
5.4 Short or full-length leg radiographs?	124
5.4.1 Results	127
5.4.2 Discussion	129
5.4.3 Conclusions	129
5.5 Wear and wear rate	130
5.5.1 Materials and methods	130
5.5.1.1 Patient characteristics	130
5.5.1.2 Determining the amount of wear and wear rate	130
5.5.2 Statistical analysis	131
5.5.3 Results	133
5.5.3.1 Presence of wear	133
5.5.3.2 Wear rate	133
5.5.4 Discussion	134
5.5.5 Conclusions	136
5.6 Wear and alignment of the prosthesis	136
5.6.1 Material and Methods	136
5.6.1.1 Patient characteristics	136
5.6.1.2 Alignment of the prosthesis	136
5.6.2 Statistical analysis	138
5.6.3 Results	138
5.6.3.1 Angle <i>a</i>	138
5.6.3.2 Angle <i>b</i>	138
5.6.3.3 Angle <i>g</i>	138
5.6.3.4 Angle <i>s</i>	139
5.6.4 Discussion	141
5.6.5 Conclusions	142
5.7 Wear and alignment of the limb	143
5.7.1 Materials and methods	143
5.7.1.1 Patient characteristics	143
5.7.1.2 Alignment of the limb	143
5.7.2 Statistical analysis	144
5.7.3 Results	144
5.7.3.1 Femoro-tibial angle	144
5.7.3.2 Weight Bearing Ratio	145
5.7.4 Discussion	146
5.7.5 Conclusions	147

CHAPTER 6: RADIOGRAPHIC EXAMINATION: THE EVALUATION OF RADIOLUCENCY	149
6.1 Introduction	150
6.2 Material and methods	150
6.2.1 Patients	150
6.2.2 Measurement of radiolucency	151
6.2.3 Scoring system	152
6.3 Statistical analysis	154
6.4 Results	155
6.4.1 Prostheses without clinical signs of loosening	155
6.4.1.1 Radiolucency around the femoral component	155
6.4.1.2 Radiolucency around the tibial component (anteroposterior view)	157
6.4.1.3 Radiolucency around the tibial component (lateral view)	159
6.4.2 Radiolucency around the patellar component	160
6.4.3 Anterior knee pain, radiolucency and osteophytes	161
6.4.4 Radiolucency around the total prosthesis	162
6.4.5 Factors that may influence the amount of radiolucency	164
6.4.6 Factors that may influence the increase of radiolucency	166
6.4.7 Prostheses with clinical signs of loosening	166
6.4.7.1 Radiolucency around the femoral component	166
6.4.7.2 Radiolucency around the tibial component (anteroposterior view)	168
6.4.7.3 Radiolucency around the tibial component (lateral view)	168
6.4.7.4 Radiolucency around the total prosthesis	169
6.5 Discussion	170
6.6 Conclusions	172
 CHAPTER 7: RETRIEVAL STUDY	 175
7.1 Introduction	176
7.2 Material and methods	176
7.2.1 Patient characteristics	176
7.2.2 Wear rate	177
7.2.3 Modes of damage	177
7.2.4 Location of wear	180
7.2.5 Severity of wear	180
7.2.6 Marks of the screw	181
7.2.7 Backside wear	181
7.2.8 Analysis of the metal tibial baseplates and the femoral components	182
7.3 Statistical analysis	182
7.4 Results	182
7.4.1 Analysis of retrieved polyethylene inserts	182
7.4.1.1 Wear rate	182
7.4.1.2 Modes of damage, severity and location	182
7.4.1.3 Burnishing	183
7.4.1.4 Scratching	183
7.4.1.5 Pitting	183
7.4.1.6 Surface deformation	183
7.4.1.7 Delamination	186
7.4.1.8 Abrasion	187
7.4.1.9 Bone-Cement debris	187
7.4.1.10 Total Score for each section	187
7.4.1.11 Wear and primary diagnosis	187
7.4.1.12 Wear and body weight	188
7.4.1.13 Wear and service life	188
7.4.1.14 Marks of the screw	189
7.4.1.15 Wear and screw loosening	191
7.4.1.16 Backside wear	194

7.4.2 Analysis of retrieved metal tibial baseplates	196
7.4.3 Analysis of retrieved femoral components	197
7.5 Discussion	197
7.6 Conclusions	200
CHAPTER 8: GENERAL OVERVIEW OF RESULTS AND CONCLUSIONS	201
8.1 Long-term survival and clinical performance of the SKI prosthesis	202
8.2 Complications	203
8.3 Screw loosening: incidence, factors contributing to it and consequences	204
8.4 Survival and clinical performance after polyethylene exchange	204
8.5 Determining the amount of wear in vivo	205
8.6 Wear characteristics and factors contributing to wear	206
8.7 Determining alignment on a short radiograph	207
8.8 Alignment of the prosthesis and the leg	207
8.9 Alignment of the prosthesis and wear	207
8.10 Radiographic long-term results	208
8.11 Lessons we can learn from the SKI prosthesis	208
